

Fashion Speaker

NT-111A+111B+111C+111D FS

Fashion Speaker (NT-111A+111B+111C+111D FS)

The Nova Fashion Speaker series (NF-111A/B/C/D FS) provides stylish audio solutions for design-conscious environments. These speakers feature versatile power configurations ranging from 2.5W to 80W across different models, housed in durable high-impact polystyrene (HIPS) enclosures weighing between 2.5kg to 6.6kg. The series delivers consistent audio performance with 87-89dB sensitivity and 90-200Hz frequency response (extended to 40-200Hz on the NF-111D model), suitable for both background music and voice reproduction. With flexible connectivity options including 70V-100V line voltage support (8Ω impedance on NF-111B), these speakers easily integrate into various audio systems while maintaining their decorative appeal. The compact NF-111A (220x150x125mm) to larger NF-111D (417x289x255mm) models offer scalable solutions for boutique stores, hotel lobbies, and modern homes where both aesthetic integration and sound quality are priorities. Note: Product image shows alternate model numbering (NT-111A+111B...) that differs from technical specifications.

KEY FEATURES

The Nova NF-111 series provides 2.5W-80W power flexibility through full-range drivers in HIPS cabinets (2.5-6.6kg), featuring 87-89dB sensitivity and 90-200Hz response (extended to 40Hz on NF-111D). With 70V-100V/8Ω support and decorative designs, these speakers enhance spaces where style meets audio performance.
